

2013 TOXIC REDUCTION PLAN SUMMARY
for
CHROMIUM & NICKEL

BASIC FACILITY INFORMATION

Facility Identification	
Company Name	DCL International Inc.
Facility Name	Millway Facility
National Pollutant Release Inventory (NPRI) Identification Number	27813
Ontario MOE ID Number	N/A
Number of Full-time Employees	54
2 Digit NAICS	33
4 Digit NAICS	3363
6 Digit NAICS	336390
UTM Spatial Coordinates (NAD83)	Latitude: 43.80687 & Longitude: -79.53048 UTM Zone: 17, UTM Easting: 618203, UTM Northing: 4851477
Facility Address	504 Millway Ave, Vaughan, Ontario L4K 3V5

Highest Ranking Employee of the Facility

Name	Leonard Polakowski
Position	Operations Manager
Address	504 Millway Ave, Vaughan, Ontario L4K 3V5
Phone Number	416-637-0359
Fax Number	905-761-8216
E-mail address	lpolakowski@dcl-inc.com

Toxic Substances for Which Facility Must Prepare A Plan

Substance Name	Chemical Abstracts Service (CAS) Registry Number
Chromium	NA-04
Nickel	NA-11

Plan Contact Information	
<i>Person Coordinating the Preparation of the Plan</i>	
Name	Mihaela Draghici
Position	Environmental Consultant
Address	7-150 Jardin Drive, Concord, ON L4K 3P9
Phone Number	(905) 761-1786
Fax Number	(905) 761-6524
E-mail address	mdraghici@envirovision-inc.com
<i>Person Who Prepare the Plan</i>	
Name	Mihaela Draghici
Position	Environmental Consultant
Address	7-150 Jardin Drive, Concord, ON L4K 3P9
Phone Number	(905) 761-1786
Fax Number	(905) 761-6524
E-mail address	mdraghici@envirovision-inc.com
<i>Planner Responsible for Making Recommendations</i>	
Name	Mihaela Draghici
Position	Environmental Consultant
Address	7-150 Jardin Drive, Concord, ON L4K 3P9
Phone Number	(905) 761-1786
Fax Number	(905) 761-6524
E-mail address	mdraghici@envirovision-inc.com
Planner License Number:	TSRP0131
<i>Planner Responsible for Certification</i>	
Name	Mihaela Draghici
Position	Environmental Consultant
Address	7-150 Jardin Drive, Concord, ON L4K 3P9
Phone Number	(905) 761-1786
Fax Number	(905) 761-6524
E-mail address	mdraghici@envirovision-inc.com
Planner License Number:	TSRP0131

STATEMENT OF INTENT - CHROMIUM

DCL is committed to playing a leadership role in protecting the environment. Whenever feasible, we intend to reduce the use, air releases, and off-site transfer in compliance with all Federal and Provincial Regulations. Our employees are encouraged to participate in all types of toxic use reduction activities. Toxic use reduction will be an ongoing effort for DCL-Millway and we will continue to monitor technological advancements to ensure that reduction options that are both technological and financially feasible are implemented at our facility. Chromium is created at the facility as a combustion by-product in negligible quantity.

OBJECTIVES OF THE PLAN AND TARGETS

DCL does not intend to reduce the use of Chromium at this time. Chromium is used in several types of steel, welding wire and electrodes. DCL-Millway is committed to ensure that Chromium is used in a responsible and efficient manner. Chromium is created at the facility as a combustion by-product in negligible quantity.

FACILITY DESCRIPTION – Description of why Chromium is used and/or created

DCL is a leader in the design and manufacture of catalytic converters, catalytic mufflers, diesel particulate filters and stock mufflers for the air pollution control of off-highway vehicles, stationary engines, industrial processes and specialized on-highway vehicles. DCL supplies to world leading engine manufacturers, original equipment manufacturers and aftermarket retrofit

In the manufacturing of metal custom-made parts Chromium is used in various stainless and mild steel and in welding wire and electrodes. The main processes at the facility are: laser cutting and welding.

Chromium is created at the facility as a combustion by-product in negligible quantity.

DESCRIPTION OF OPTION TO BE IMPLEMENTED

DCL-Millway considered several reduction options. However, none of these options could be identified both technically and economically to be feasible for implementation at this time. Therefore, DCL-Millway does not intend to reduce the use or creation of Chromium.

STATEMENT THAT THE PLAN SUMMARY REFLECTS THE PLAN

This Plan Summary accurately reflects the Toxic Reduction Plan for the Chromium dated September 10, 2014.

STATEMENT OF INTENT - Nickel

DCL is committed to playing a leadership role in protecting the environment. Whenever feasible, we intend to reduce the use, air releases, and off-site transfer in compliance with all Federal and Provincial Regulations. Our employees are encouraged to participate in all types of toxic use reduction activities. Toxic use reduction will be an ongoing effort for DCL-Millway and we will continue to monitor technological advancements to ensure that reduction options that are both technological and financially feasible are implemented at our facility. Nickel is created at the facility as a combustion by-product in negligible quantity.

OBJECTIVES OF THE PLAN AND TARGETS

DCL does not intend to reduce the use of Nickel at this time. Nickel is used in several types of steel, welding wire and electrodes. DCL-Millway is committed to ensure that Nickel is used in a responsible and efficient manner. Nickel is created at the facility as a combustion by-product in negligible quantity.

FACILITY DESCRIPTION – Description of why Nickel is used and/or created

DCL is a leader in the design and manufacture of catalytic converters, catalytic mufflers, diesel particulate filters and stock mufflers for the air pollution control of off-highway vehicles, stationary engines, industrial processes and specialized on-highway vehicles. DCL supplies to world leading engine manufacturers, original equipment manufacturers and aftermarket retrofit

In the manufacturing of metal custom-made parts Nickel is used in various stainless and mild steel and in welding wire and electrodes. The main processes at the facility are: laser cutting and welding.

Nickel is created at the facility as a combustion by-product in negligible quantity.

DESCRIPTION OF OPTION TO BE IMPLEMENTED

DCL-Millway considered several reduction options. However, none of these options could be identified both technically and economically to be feasible for implementation at this time. Therefore, DCL-Millway does not intend to reduce the use or creation of Nickel.

STATEMENT THAT THE PLAN SUMMARY REFLECTS THE PLAN

This Plan Summary accurately reflects the Toxic Reduction Plan for the Nickel dated September 10, 2014.

2013 Toxic Substance Reduction Plan Summary
DCL International Inc.
504 Millway Ave, Vaughan, Ontario L4K 3V5

CERTIFICATION BY HIGHEST RANKING EMPLOYEE

As of September 10, 2014, I, Leonard Polakowski, certify that I have read the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the plans are factually accurate and comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act, with the exception of the regulatory deadline.
