Annual Progress Report – Calendar 2014

Substance for which toxic substance reduction plan has been prepared:

Substance Name	CAS #	Toxic Reduction Plan Date
Chromium and its compounds	NA-04	September 22, 2014

Objectives

DCL does not intend to reduce the use of Chromium at this time. Chromium is used in several types of steel, welding wire and electrodes. DCL-Bradwick is committed to ensure that Chromium is used in a responsible and efficient manner. Chromium is created at the facility as a combustion by-product in negligible quantity.

Toxic Reduction Progress

The current reporting year saw slight increases for chromium primarily due to an increase in the facility's production in 2014 for several materials and material reformation.

Plan Implementation Progress

There were no reduction options identified in any of the plans for the above noted substances that were identified as being both technically and economically feasible. No additional actions outside the plans were taken in 2014 to reduce the use and/or creation for any of the reportable substances. No amendments were made to the toxic substances reduction plans in 2014.

ON MOE TRA Certification Statement

Annual Report Certification Statement

As of 12/05/2015, I, John Muter, certify that I have read the reports on the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
